Albany, N. Y., Jan. 3.—Those political lawyers who are serving as special attorneys to State hospitals were appointed under the authority of a paragraph dragged into the Appropriation bill in 1897. This paragraph reads:

Washington, Jan. 3.—The ravages of grip among the members of the House and Senting are serving as special attornates and serv

The dunacy commission shall appoint an attorney for each State heapital, who shall conduct all of the legal business required to be done for on account of said hospital, at a stated sum, to be fixed by the commission, and which shall be a charge upon the maintenance account and paid as other expenses of the hospital are now paid.

This bill was delayed in the Legislature and adjourned when this paragraph was discovered in the executive chamber. It had to be sauctioned by Governor Black or the entire appropriation would have been held up. The special attorneys appointed have held their places ever since. That they have done so illegally and in clear violation of the State Constitution seems to be certain. Section 22 of Article III. of the Constitution, reads:

No provision or enactment shall be embraced in the bill, and any such provision or caactment shall be limited in its operation to such appropriation that be been ill for the last two weeks. No information concerning the services rendered by them or whether they filled any public need at all could be obtained at the office of the Lunacy Commission. Former Comptteller James R. Roberts was asked to night who could be held responsible for the money paid. He replied:

"I would not care to discuss that matter without examining it with care. If you have quoted the Constitution accurately there seems to be excuse for these attorneys holding over during 1898."
